

## BEWARE OF

### So Called Natural Founder Specialist

Yep, Lord, I hate to say this but... Folks, there are people out there that will lie, cheat, plagiarize, and even worse, HARM Horses in the cause of bettering not the Horse, but themselves.

I will not mention names. I don't need to. These people eventually discredit themselves with claims that cannot be backed up. Those of you that have dealt with these "professionals" you will know exactly to whom I am talking about...

First, let me ask this question: *Is it possible for a non superman to trim 800 Horses each month*, as a trimmer in North Georgia has claimed? Do the math. That's 26.66666 Horses per day, 7 days a week, 4 weeks a month. Oh, and in his spare time he gives clinics, writes books and attends other people's clinics.

IF it is possible, could he do THE job each **individual** Horse NEEDS?

If this trimmer has ALL the answers, why is it his "approved trimmers" cannot fix simple issues, such as toed out?

If "he" discovered new tissues in the Horses' feet, why, then, did "he" find it necessary to attend (under false pretenses) a clinic given by those that DID make this new discovery?

If "he" fully understands INDIVIDUAL HOOF CASES, why does "he" continue to practice methods that are opposite of this "new information"?

Folks, if a Trimmer or Farrier claims to have "our information" and reputation for fixing problematic Horses and you are NOT seeing results, you may have been lied to. For that, I am sorry, as I am sure the other members of our team are. The best way to determine you are hiring a member that has studied fully the protocols and methods of our Founder Recovery Program you need to contact me or another member of my team, which I would be happy to supply. And, yes, we do travel worldwide.

Thank You,

David Qualls
